Wi2Wi Announces Strategic Equipment Investments to Expand Production Capacity

Advanced Seam welding and Cleanroom Systems to Be Fully Operational in Q4 2026

Middleton, Wisconsin – August 13, 2026 – Wi2Wi Corporation (TSX-V: YTY), is pleased to announce the recent acquisition of advanced manufacturing equipment as a key step in its ongoing capacity expansion and operational excellence initiatives. The investments include a seam welder, complementary cleanroom and environmental control systems. These additions are designed to significantly increase production throughput, enhance process consistency, and support growing demand for the Company's high-reliability precision timing and frequency control products. The new equipment is expected to be fully operational in Q4 2026.

In technology manufacturing, hermetic sealing and controlled-environment processing are critical to delivering mission-critical components that meet stringent defense, aerospace, medical and industrial specifications. The new equipment strengthens Wi2Wi's vertically integrated, Made-in-USA manufacturing capabilities at its Middleton, Wisconsin facility.

Key Highlights

- Acquisition of the seam welder system, enabling high-precision, high-throughput hermetic sealing of packages.
- Investment in a modular vacuum/nitrogen pass-through oven, front-load air locks, automatic valves, and vacuum control modules to expand cleanroom processing capacity and environmental control.
- Equipment expected to be fully operational in Q4 2026, contributing to increased production volume, reduced cycle times, and improved process reliability.
- Strengthened ability to support higher-volume defense and aerospace programs with on-time delivery of crystals, oscillators (TCXO, VCXO, OCXO), and quartz filters.

Sue Amarin, CEO and Director, states: "This capital investment is a natural extension of our operational turnaround and capacity expansion strategy. The new equipment gives us the tools to scale production efficiently as we respond to the increased customer demand, while maintaining the precision and reliability our blue-chip customers expect. With full operational readiness targeted for Q4 2026, and combined with our recent yield improvements, we are well positioned to support our customers and capture greater market share in high-reliability applications."

The new systems complement Wi2Wi's existing manufacturing infrastructure and reinforce the Company's expansion strategy, commitment to process optimization, quality control, and Made-in-USA production excellence. Once fully operational in Q4 2026, these advancements are expected to support expanded capacity for high-reliability crystals, oscillators, and quartz filters that serve the stringent requirements of defense, aerospace, medical, and industrial markets.

About Wi2Wi Corporation

Wi2Wi Corporation (TSX-V: YTY) is a vertically integrated, Made-in-USA manufacturer of high-reliability precision timing and frequency control products for defense, aerospace, medical and industrial applications. Headquartered in Middleton, Wisconsin, the company delivers industrial and MIL-SPEC crystals, oscillators, and filters under the Precision Devices brand.
